

LIDIA TALAVERA

Belts are measured from the end of the Buckle to the middle hole. Sizing and measurements of the belt may differ depending on where the belt is worn (waist vs hips). Please see Measuring Tips

Women High Rise

60	46	125
62	48	130

Measuring Tips:

Measuring a similar style and well-fitting belt you already own is the best way to determine the perfect belt size. Lay the belt on a flat surface. With a measuring tape, measure from the end of the belt where it meets the buckle to the center hole. See picture below.

Based on Pant Size

Add 2" to your pant size waist. For example, if you wear a 34" waist pants, chose a 36" size belt.

Based on your current measurements

Determine where the belt will be worn, Wait or Hip area. With a soft measuring tape, measure the allowing two fingers to slip between the measuring tape and the determined area. Enter that measurement in the "Select Size" box.

The measurement you enter will be taken to customize the belt's size from the buckle to the middle hole (total of 5 holes).

If you desire a looser fit, please enter the measurement that will allow for your desired fit.

If you do not have a measuring tape. Use a string to measure the circumference of the neck and measure the string with a ruler.
